**VOLUNTIS IS A MEDICAL
DEVICE COMPANY DEDICATED
TO DEVELOPING COMPANION
SOFTWARE THAT EMPOWERS PATIENTS
TO SELF-MANAGE THEIR CHRONIC
DISEASE IN COLLABORATION
WITH THEIR MEDICAL TEAM.**

Companion software

noun / kəm'panjən 'sɒftweər /

Combines a patient mobile app and physician web portal to enhance the effectiveness of an existing medical therapy. The app delivers treatment recommendations and coaching messages to the patient, then communicates patient data to the physician to enable remote collaboration.

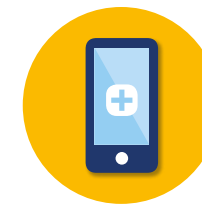

OUR MISSION

Our **mission** is to **improve**
the real-world value of therapies
by providing patients and healthcare professionals
with **therapeutic companion software**.

Our **mobile and cloud solutions** embed
real-time decision support algorithms
that empower patients to
actively manage their medication therapy
in **remote collaboration** with their healthcare team,
increasing **treatment safety and efficacy**.

OUR SOLUTIONS

Patient Mobile App

Mobile app provides real-time prescribed medication dosage & coaching to patients.

HCP Web Portal

Web portal delivers remote monitoring capabilities and tailored notifications to health care practitioners.

Partnerships

Our solutions are the subject of multi-year partnerships in Europe and the US, including with

Roche
AstraZeneca
National Cancer Institute
Sanofi

HOW IT WORKS

HOW COMPANION SOFTWARE CAN EMPOWER PATIENTS

Self-management of treatment dosage

Leveraging clinical algorithms, companion software recommends personalized treatment doses. The doses are adjusted regularly according to the data the patient inputs, such as symptoms, diet, exercise, etc. as defined by the parameters of the algorithm.

Remote collaboration with healthcare team

Companion software includes a patient app and corresponding HCP web portal that support real-time communication to promote collaboration.

Self-reporting of outcomes

Patients are reminded to input their data to better track their progress, which can then be analyzed using automatically-generated graphs and charts.

Self-management of symptoms

Symptoms, such as diarrhea, blood pressure and nausea, can also be managed to improve treatment adherence.

Coaching messages

Coaching messages and therapeutic education content are pushed according to the patient's needs and activities to increase motivation.

OUR LEADERSHIP TEAM

Pierre LEURENT
Chief Executive Officer

Romain MARMOT
Chief Operating Officer

Alexandre CAPET
Chief Strategy & Marketing Officer

Geneviève D'ORSAY
Chief Medical Officer

Étienne VIAL

OUR REGULATORY EXPERTISE

We are compliant with worldwide regulatory standards

FDA

In the US, our quality management system is compliant with **Code of Federal Regulations Title 21 Part 820**.

CE

In Europe, our devices are compliant with **European Council Directive 93/42/EEC** for medical devices.

ISO

Our quality management system is compliant with **ISO 13485:2003 & 9001:2008**.

IEC

Internationally, our processes are compliant with **IEC 62304 & 62366** standards for medical devices.

WHY OUR PRODUCTS ARE UNIQUE

Active medication management

Our solutions embed decision-support algorithms that aim to personalize treatment, empower patients and encourage care collaboration.

Regulatory clearance

Our products require approval from US and EU regulatory bodies, because of their intended use for decision support.

Prescription only

Our products must be prescribed by healthcare professionals.

Clinical evidence

Our products are clinically tested through randomized clinical trials.

VOLUNTIS BY THE NUMBERS

Our solutions are operated in

10 countries

Europe's largest private equity fund raising in

digital health in 2014

700,000 patients supported and monitored.

Covering over **20 therapeutic areas**

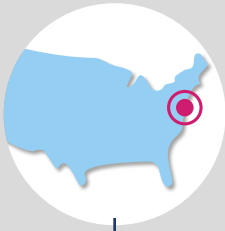

Our last **€21M** fundraising round in 2014

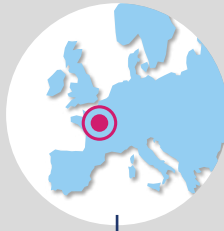

was primarily aimed **at increasing
our US presence**
